Whatever the conformation of the hydrocarbon chain, β^2 -oxidation occurs normally until the acyl CoA (because of the presence of a double bond) is not an appropriate substrate for acyl CoA dehydrogenase, or enoyl CoA hydratase: . If the acyl CoA contains a cis- β^2 bond, then cis- β^2 -Enoyl CoA isomerase will convert the bond to a trans- β^2 bond, which is a regular substrate.

Beta oxidation - Wikipedia

Ultra-high-molecular-weight polyethylene (UHMWPE, UHMW) is a subset of the thermoplastic polyethylene. Also known as high-modulus polyethylene, (HMPE), it has extremely long chains, with a molecular mass usually between 3.5 and 7.5 million amu. The longer chain serves to transfer load more effectively to the polymer backbone by strengthening intermolecular interactions.

Ultra-high-molecular-weight polyethylene - Wikipedia

Gluconolactone is a lactone or oxidized derivative of glucose. Gluconolactone is a polyhydroxy acid (PHA) that is capable of chelating metals and may also function by scavenging free radicals, thereby protecting skin from some of the damaging effects of UV radiation.

Gluconolactone | C6H10O6 - PubChem

It is widely acknowledged that the excessive reactive oxygen species (ROS) or reactive nitrogen species (RNS) induced oxidative stress will cause significant damage to cell structure and biomolecular function, directly or indirectly leading to a number of diseases. The overproduction of ROS/RNS will be balanced by nonenzymatic antioxidants and antioxidant enzymes.

Reviews on Mechanisms of In Vitro Antioxidant Activity of

A chemical formula is a way of expressing information about the proportions of atoms that constitute a particular chemical compound, using a single line of chemical element symbols and numbers.

N,N,4-Trimethylbenzenamine | C9H13N - PubChem

ABSTRACT. Free radicals induce lipid peroxidation, playing an important role in pathological processes. The injury mediated by free radicals can be measured by conjugated dienes, malondialdehyde, 4-hydroxynonenal, and others.

Importance of the lipid peroxidation biomarkers and

Photostability studies of drugs and drug products are an integral part of the product development process in

the pharmaceutical industry. These studies are carried out to ensure quality, efficacy, and safety of the formulated products during manufacture, storage, and use. This review deals with the concept of photostability and related aspects and the literature available in the field.
