E-waste or electronic waste is created when an electronic product is discarded after the end of its useful life. The rapid expansion of technology means that a very large amount of e-waste is created every minute.. Electronic waste or e-waste may be defined as discarded computers, office electronic equipment, entertainment device electronics, mobile phones, television sets, and refrigerators.

### **Electronic waste - Wikipedia**

1. Introduction and Definitions 1.1 Definitions Terms used in this guidance have the same meaning as in the ADR and current national legislation concerning the carriage of dangerous goods by road.
