Lesson 4.8: Life Science Darwin & Evolution

The Theory of Evolution by Natural Selection The theory of evolution by natural selection is a theory about the mechanism by which evolution occurred in the past, and is still occurring now. The basic theory was developed by both Darwin and Wallace, however, Darwin gave a much fuller argument. The theory states that biological change takes ...

Darwin's Theory of Evolution by Natural Selection

Darwin's Theory of Evolution is the widely held notion that all life is related and has descended from a common ancestor: the birds and the bananas, the fishes and the flowers -- all related. Darwin's general theory presumes the development of life from non-life and stresses a purely naturalistic (undirected) "descent with modification".
