Is This for Me? Yes, if you want to build the right product. Your title is probably systems engineer, software engineer, business analyst, systems analyst, project leader, requirements engineer, product or program manager or similar. Or if you are a user or software customer and want to ensure the requirements process delivers what you need.

Requirements Co-Engineering

In product development and process optimization, a requirement is a singular documented physical or functional need that a particular design, product or process aims to satisfy. It is commonly used in a formal sense in engineering design, including for example in systems engineering, software engineering, or enterprise engineering. It is a broad concept that could speak to any necessary (or ...
