The broaden-and-build-theory could be defined as a model for explaining the mechanisms behind positive emotions in our minds and bodies, what their effects are, what the evolutionary reason is behind them and why studying them is so important for our well-being.. Studying emotions has always been a challenge. There are different points of view as to what is considered an emotion.

What is the Meaning of Self-Determination Theory? Self-Determination Theory, or SDT, is a theory that links personality, human motivation, and optimal functioning.

### **What is Self-Determination Theory? Definition and Examples**

Self-determination theory (SDT) is a macro theory of human motivation and personality that concerns people's inherent growth tendencies and innate psychological needs. It is concerned with the motivation behind choices people make without external influence and interference. SDT focuses on the degree to which an individual's behavior is self-motivated and self-determined.

### **Self-determination theory - Wikipedia**

Self-Determination Theory (SDT) is a theory of motivation.. It is concerned with supporting our natural or intrinsic tendencies to behave in effective and healthy ways. SDT has been researched and practiced by a network of researchers around the world.. The theory was initially developed by Edward L. Deci and Richard M. Ryan, and has been elaborated and refined by scholars from many countries.
