Can scientific methods prove the existence of God

There is a variety of evidence for God's existence, ranging from deductive arguments for a "First Cause" to personal testimony of a personal God. Evidence does not constitute logical, mathematical, nor scientific proof, but is instead facts and arguments which fit better with biblical claims than with atheistic or other claims.

This article shows that religion has been consistently important in predicting voters’™ party choices in Britain over time. The relationship between religion and party preference is not primarily due to the social make-up of different religious groups, nor to ideological differences between religious groups, whether in terms of social conservatism, economic leftism or national identity.
