The Semantic Web is an extension of the World Wide Web through standards by the World Wide Web Consortium (W3C). The standards promote common data formats and exchange protocols on the Web, most fundamentally the Resource Description Framework (RDF). According to the W3C, "The Semantic Web provides a common framework that allows data to be shared and reused across application, enterprise, and ...

Solution architects and developers have many architectural options at their disposal. In this article, we discuss semantic model architectures and describe the semantic model approach and how it fits in context of other architectural patterns. We highlight the value of semantic models as a core component in solution design and show how IBM Integrated Information Core enables creation of model ...
